OBJECTIVES

Work and evolve as a Software Developer and have a career on it. Integrate a sophisticated team with a passion of innovation, imagination and creativity, prior than just professionalism.

EDUCATION

Instituto Superior de Engenharia do Porto

1-7-2015

Degree in Informatics Engineering

PROFESSIONAL EXPERIENCES

Kj Tech Services GmbH (GERMANY)

Application Developer | Web Developer | IT Support
01.07.2017

Business: Automotive Testing

Tasks: General web site using Laravel Php Framework + MySQL to handle multiple functions required by the organization. Self-responsibility for the database and domain models structure. Also working on a WPF Application for managing more complex functionalities like the driver's shift scheduler.

Technologies: Laravel, PHP, HTML, JAVASCRIPT, CSS, AJAX, C#, WPF, XAML, MVVM pattern, GIT, MySQL, .NetFramework

Foodintech (PORTUGAL)

Software Developer | IT Support | Tester | Automation Programs
11.11.2014 – 11.11.2016

Business: Desktop application **MES** (Manufacturing Execution System).

Tasks: Delivers/builds/updates upgrades, IT support, new features to our WPF (C#) main application, plan and execute functional tests, new tools to automate internal repetitive procedures and finally, specific client data reports in MS SQL.

Technologies: C#, WPF, MVVM Pattern, MERCURIAL, MS SQL, S.O.L.I.D, .NET

Beware (Academic Stage) (PORTUGAL)

Web Developer
15.09.2013 – 15.02.2014

Business: Mobile and web services for the tourism and culture markets.

Tasks: New back and front end features to one of our websites. Three-layer architecture (UI, BLL, DLL) was used. Soap web services were used between each layer. Mobile team could use the same web services created by me in JSON or XML format. Technologies like Google Maps Api, NFC and QRCode were available.

Technologies: HTML, CSS, ASP.NET, JAVASCRIPT, MS SQL, WTF, C#, .NET, MVC Pattern.

ABOUT ME

I believe, that by looking around to our world, we can find some action we do manually and frequently in our daily life, and that could be simplified through technology. Personally, I've in mind projects of my own with the purpose to help myself on a financial, health, future self-planning, and professional life. Till now, I designed and improved a personal graphic interface using WUA (Windows Universal Apps) which I intent to use on my personal projects. Due to its flexibility to change, I adapted it to my Digital CV which you can download from my dropbox shared folder [here](#).

UNIVERSITY AND DEGREE OVERVIEW

Instituto Superior de Engenharia do Porto is a very well-known Polytechnic Engineering University in Porto. Its slogan is "Know how to do it" and its philosophy came from the MIT on which at a certain moment in time, was considered that a too much theoretical learning lead to a not so good result when applied to "real" life. Therefore, to better fit the business market, besides having still a good theoretical knowledge, the learning model was focused on a more practical way, on which there's a team project at the end of each semester that simulate an organizational environment. Those projects are better explained on the respective attached file (Academic Projects Overview).

Main fields of study: Math, Management, Programming, Computer Systems, Informatic Systems.

SOFT SKILLS

- ☐ Task Scheduling and Planning
- ☐ Productive Working (Pomodoro Technique)
- ☐ Proactive and Auto didact

STRENGTHS

- ☐ Creativity
- ☐ Hard Working
- ☐ Resistance

LANGUAGES

- ☐ Portuguese (Main language)
- ☐ English (Course in Wall Street English)
- ☐ German (B2)

ANNEX

- ☐ Complete list of Hard Skills
- ☐ Diploma of my Informatics Engineering degree
- ☐ Academic Projects Overview
- ☐ Wall Street English – General English Certificate
